LEARN MORE ABOUT THIS PRODUCT

The Interactive Resource Management Center (iRMC) is a powerful workload, resource, and performance management tool that combines real-time resource tracking and performance monitoring to identify ongoing opportunities for executing agency strategy, optimizing the use of available resources, and extending the reach of agency resources.

iRMC offers easy access to indicators that target improvements in productivity, resource utilization, and outcomes. It links key performance measures with strategic and tactical objectives to help agency managers execute strategies successfully with limited resources. If you want to maximize the resource capacity and performance of your agency, this robust resource management tool will exceed your expectations.

1. Gain objective and timely insights into agency performance

2. Achieve greater insights and control of agencies resources and resource allocation

3. Manage dynamic workload demands and bottlenecks that impact performance

4. Deconflict and prioritize the use of agency resources

5. Monitor current performance activities in relation to agency objectives and strategies in real-time

6. Close the gap between strategy and execution by utilizing idle and redirecting misaligned resources

7. Proudly increase agency performance and productivity

PROVEN AND RELIABLE

By combining agency objectives with real-time performance metrics and instant access to a library of best practices, iRMC provides agencies with the ability to do much more with less and consistently exceed agency goals.

Agencies using iRMC have seen unprecedented increases in productivity and resounding success in expanding services and increasing problem-solving activities with existing resources, including:

- $5.7 million in annual productivity gains for over 5 years
- $1.9 million performance gain in just 6 months
